ADD SOMETHING SPECIAL TO EVERY PROJECT.

Whether you're looking for a signature design element or simply want your next project to have an added "wow" factor, more attention to your window and door design choices goes a long way. Let light pour into a room in a unique way, or add a contemporary, textured finish to exterior trim. It's a sure way to enhance the value of your projects and your reputation.

1 WALLS OF GLASS

Fully load-bearing with glue-laminated wood beams that create an all-wood interior, a Timber Curtain Wall can inspire innovative wall designs with clean, straight lines and stunning views. Whether you need large daylight openings for your contemporary residential designs, or a smart solution for your commercial curtain wall applications, a Timber Curtain Wall can meet or exceed today's high energy standards. You can even incorporate doors, operable windows, or use them as structural corner units in wall creations over 14'high.

2 A SIGNATURE ENTRANCE

Photo: Jon Eady Photographer | Faye Crowe Architect, LLC

Build bold with the design inspired, modern appearance of a brand new Pivot Door. Engineered to float inside their frame on a set of pins mounted in the top and bottom of the door panel, these amazing new doors offer clean lines and a simplicity of form and function that sets them apart from any other entrance door. For a distinctive, custom approach, Pivot Doors are a great place to start.

3 TEXTURED EXTERIOR FINISHES

Exterior clad finishes are available in some truly unique colors and textures, including Cajun Spice and Pesto. To expand your choices even more, Peppered Steel is another eye-catching design touch. This modern industrial finish gives both residential and commercial buildings the high-end look of steel that blends with nearly any architectural style you choose. It's one of the many ways to use fenestration design details to your advantage.

4

VANISHING DOORS

The ability to make walls completely disappear is a door design trend worth looking into. Transform your living space with unobstructed views in a wide range of sizes, configurations, and design options. Newly introduced Lift & Slide Pocketing doors are designed with advanced mechanics that defy gravity. Multi-Slide doors are engineered to give you years of silky-smooth service whether they slide in one direction, split around a 90-degree corner or into a pocket in the wall. Vanishing doors can fully complement your living space and start a stunning conversation.

5 NARROW SIGHTLINES & CONTEMPORARY STYLING

Urban Casement and Awning windows set a new standard in contemporary design with modern industrial aesthetics, one of the narrowest sightlines in the industry and some beautiful new contemporary hardware. To push the contemporary look even further, try a striking Ultra Coat Black interior finish. It's sure to give any project a beautifully modern, on-trend accent.

SIERRA PACIFIC WINDOWS

With 125 combined years in the window and door business, we're a household name west of the Rockies, and our reputation is quickly making its way across the rest of the country. Who is Sierra Pacific Windows? We're the company building the most uncompromising windows and doors possible for clients with the highest expectations, a fact we're proving one beautiful project at a time.

Today, Sierra Pacific products are installed in 30 countries around the globe, with a focus on residential and light commercial construction in North America. The company supports more than 600 dealers, distributors and company stores across the country, with three manufacturing plants strategically located to deliver your order when you need it.
